

I am having a problem that even though I press 1~7, background does not change. It is just black. This is what I need to figure out.

It was interesting that in OpenFrameworks, I need to type `ofTrueTypeFont` font; and `font.drawString` to write a sentence. Also, I am a bit confused that can I put "day" where a number of day which might be "0"? because I was changing so many times to get "build Succeeded". Also, I am wondering that is it okay to put "time" instead of `json["daily"]["data"]`....
